- Analytical mindset
- Teamwork
- Clear communication
- Adaptability
- Time management
- Attention to detail
- Continuous learning

Xavier Ninga

Full-Stack Developer · AI Automation Engineer · Digital Solutions Builder

PROFESSIONAL PROFILE

Full-Stack freelance developer and AI automation engineer who designs and ships custom web applications, mobile apps and intelligent automation systems. Every product is hand-coded — no templates, no page builders — so it fits the business it serves. I help companies streamline operations with reliable software, API integrations and AI-powered workflows.

Rigorous, autonomous and results-driven. I build scalable, secure solutions centered on real user needs.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & AI Automation Engineer

2024 – Present

Custom digital solutions for businesses, organizations and entrepreneurs.

- Custom websites and web applications built with Next.js, TypeScript and Supabase.
- Mobile apps with Kotlin, Jetpack Compose and Kotlin Multiplatform.
- AI automation systems: chatbots, WhatsApp workflows and process automation.
- Third-party API and payment integrations.
- Admin dashboards, back-office tools and member portals.
- Ongoing maintenance and technical support.

SELECTED PROJECTS

ADCCUL Digital Platform

- Cooperative credit union: Android app, website and member portal
- Secure member onboarding and digital KYC verification
- Administrative dashboard

Gilgal Towers Hospitality Platform

- Premium website for an apartment and events complex
- Online booking experience and mobile app preview
- Responsive interface, hotel management documentation

Nexora AI — AI Business Hub

- Full-stack AI SaaS platform built with Next.js
- Self-initiated product, now a portfolio showcase
- Scalable, AI-ready architecture

Luxury E-commerce Platform

- Modern online store with custom admin dashboard
- Live chat, payments dashboard and order agent bot
- User and product management on Supabase

Learning Platform with AI Exam Prep

- Live classes and AI-powered exam preparation
- Supabase-backed admin panel
- Responsive interface

AI Automation Solutions

- Business process automation
- Intelligent chatbot integration
- Multi-API connections and automated client communication

PROFESSIONAL GOAL

To put my software development, AI and automation skills to work for companies that want to accelerate their digital transformation with reliable, high-performing solutions. I partner with clients in the United States, Europe and worldwide as a freelance developer, delivering complete, production-ready work.
